

Items	Specifications
Form	Liquid
Colour	Clear, Pale green
PH value	3-5
Specific gravity (20°) g/cm ³ ≥	1.00-1.05
Composition	Isothiazoline
Solubility in water	Compeletly

General Specifications

BC-520 is a broad spectrum terminal disinfectant for use in RO systems. It is used for versatile applications for surface and water in various applications throughout food and beverage industries and institutions.

Key Features and Benefits

- Good efficiency in RO systems.
- Fungicidal with properties of broad spectrum disinfection
- high efficiency disinfection
- low toxicity and non-oxidising
- biosludge stripping effect is excellent

Application and Dosage

BC-520 should be dosed periodically at a rate of 50 - 200ppm of the total system volume.

In a badly fouled system an initial shock dose of up to 500ppm may be required. This product is effective over a wide range of pH and can be used in isolation or alternately with other non-oxidising or oxidising biocides.

Packing

BC-520 is available in 200 kgs HDPE jars and barrels.
