

Items	Specifications
Form	Liquid
Colour	Colorless to light-yellow liquid
PH value	6-9
Specific gravity (20°) g/cm ³ ≥	0.85-0.95
Composition	Benzalkonium chloride
Solubility in water	Compeletly

General Specifications

BC-540 is a broad spectrum terminal disinfectant. It is used for versatile applications for surface and water in various applications through out food and beverage industries and institutions.

Key Features and Benefits

- Excellent disinfection and detergency
- Non-tainting, for use on food contact surfaces
- Non-corrosive to system metallurgy
- Highly concentrated for low dosage
- Eco-friendly, biodegradable and skin-friendly
- High efficacy against SPC, coliforms, gram positive, gram negative bacteria & yeast

Application and Dosage

BC-540 is a cationic quaternary ammonium compound and medium foaming surfactant for disinfection and cleaning properties. For OPC operations **BC-540** should be ideally used at concentrations from 0.1 - 2.0% v/v depending upon the type of application and soil, followed with thorough rinsing with plain water

Packing

BC-540 is available in 40/60/200 kgs HDPE jars and barrels.
