

Items	Specifications
Form	Liquid
Colour	Colorless
PH value	6-8
Specific gravity (20°) g/cm ³ ≥	0.95-1.05
Composition	Quaternary Amuniom
Solubility in water	Compeletly

General Specifications

BC-550 is a high performance broad spectrum disinfectant and biocide scientifically formulated for the treatment of industrial and process water applications.

BC-550 also acts as an algaecide and can also be used successfully for the treatment swimming pool waters.

BC-550 contains a polymeric quaternary ammonium compound, is low foaming and can be used in conjunction with halogens and other organic biocides.

Key Features and Benefits

- High performance broad spectrum disinfectant and biocide for industrial systems.
- Excellent for the treatment of swimming pool waters.
- Acts as an algaecide.
- Low foaming.
- Can be used in conjunction with halogens and other organic biocides.

Application and Dosage

BC-550 at a rate of 100 ppm (100 g per 1000 L). Product can be dosed by hand or through automatic dosing equipment.

Do not mix **BC-550** with other chemicals.

Packing

BC-550 is available in 200 kgs HDPE jars and barrels.
